

Pros	Cons
<p><i>"For the first few weeks, MeMe and I had so much fun."</i></p> <p>The writer is saying that sometimes phones can be fun and not all bad</p>	<p><i>"Cass didn't invite you to her party because nobody likes you. You only have 2 "likes" on your last post. Epic fail. I H8 U."</i></p> <p>When you have a phone you compare yourself to others.</p>
<p><i>"I'd just posted a photo of the fishtail plait I'd learnt to do."</i></p> <p>Phones can be good for showing people thing you can do and keeping people updated</p>	<p><i>"What makes you think you can go anywhere without me?"</i></p> <p>I think what the writer is trying to say is that people want to go everywhere with their phones and never leave them alone.</p>
	<p><i>"I could hear my text alert going off even when I knew the phone was on silent or in another room."</i></p> <p>This means that people can get addicted to their phone and get worried that they are missing out on something.</p>
